MILWILLAH RIMFIRE R1023

INVESTING IN THE BEST

BREED-LEADING GENETICS WITH A POWERFUL COMBINATION OF WORK ETHIC & PEDIGREE.

We continue to invest in the best bulls the industry has to offer with the purchase of Milwillah Rimfire R1023 for \$80,000 in 2021.

A son of S Powerpoint WS5503 & Angus royalty in his dam line we are excited to see this promising young sires' genetics on the ground this year & beyond.

EXCELLENCE IN GENETICS

Welcome to the Absolute Angus 2nd Annual Autumn Bull Sale.

The last 12 months have seen some exciting developments here at the stud and with cattle prices at an all-time high the cattle industry has never been in better shape.

It is great to see fellow cattle breeders being able to invest into genetics to suit their herds because of the market conditions and affordability. This is great news for beef producers around the country.

Feedback from our commercial clients who purchased 2021 sale bulls report those bulls have grown out well and doing what all good bulls should be doing - producing quality progeny for their herds.

Angus genetics sits at the heart of our breeding philosophy. We seek out the best of the best the Angus world has to offer and continually strive to improve the genetics of our herds where we maintain an ongoing focus on the type of data which we believe delivers long term profitability for commercial and stud breeders.

We continue to source semen and embryos worldwide from elite Angus bulls, but hard-working bulls and females for commercial beef production are the mainstay of the Absolute Angus operation.

In 2021 we added sires of the highest calibre in the country to our operation with Milwillah Rimfire R1023, Landfall Keystone Q750 and Landfall Discovery Q543 joining our already strong gene pool.

Purchasing sires of this quality ensures the stud continues to focus on producing progeny with the important traits we value in the breed. These stud sires have well-balanced figures sitting the Top 1% of the breed for low birth, grass fed growth rates, milk, carcass and IMF in both rib and rump, and they bring longevity, productivity, and good 'doing ability' genes to our stud herd.

And not to forget Landfall New Ground N90, a stud sire who continues to prove himself time and time again. With 7 sons in the sale, this bull is undoubtedly a sire of sires - a truly magnificent bull. We could not ask for a better bull, New Ground N90 is a magnificent bull to look at and has the high data that goes with it. He is a complete package.

I'm pleased to say the Absolute female herd is getting stronger with each year with more depth, resilience, and geographical adaptability.

The progeny on offer in this sale are a clear example of our breeding focus and investment in leading Angus bloodlines in both our stud dams and sires.

Using a balance of AI sires and our own stud sires to back them up, Sitz Stellar has 12 sons on offer in this sale, the largest progeny group of this bull available in Australia. A great bull, he has brought growth and thickness to the herd along with carcass growth and leading breed traits of high rib and rump figures.

With an impressive 17 sons in the sale, Landfall Keystone K132 is continuing to breed well in the stud an all-purpose sire whose progeny will complement any herd. His sons present well with balanced EBV's with highlights in calving ease, good feet, carcass weight, EMA and rib and rump.

Baldrige Command is demonstrating to be one of the elite bulls of the Angus breed, phenotypically stunning and the data to go with it. He is producing high quality data driven progeny.

Other noted sires are Ardrossan Edmond K341, an Ardrossan Honour son with power plus that produces outstanding females. A great all rounded sire. Rennyalea L519 has also 3 sons in the sale.

Buyers looking to improve their herds with ready-to-work bulls who present with leading traits such as calving ease, growth, fertility, carcass weight and fat cover, both rib and rump, will have a range of bulls to choose from on sale day.

Working alongside the Absolute Angus team is a high calibre team of livestock professionals including Elders Stud Stock, Alex Scott & Staff and Outriders Media. Working with the calibre of this team is another exciting step forward for the longer-term development of the Absolute Angus stud.

We look forward to catching up with you on sale day and thank you for your ongoing support and interest in Absolute Angus.

Anthony Pisa

Owned in partnership with ABS Australia, New Ground N90 has an exceptional combination of phenotype & EBV's including low BW, huge growth, +6.4 scrotal, +30 docility, positive fat & +3.3 IMF! Significant Angus maternal pedigree featuring World Leading Angus sires; Reality, Emperor, Infinity, Reagan, 036, Scotchcap, M032.

LANDFALL NEW GROUND N90

Angus genetics sits at the heart of our breeding philosophy. We seek out the best of the best the Angus world has to offer and continually strive to improve the genetics of our herds where we maintain an ongoing focus on the type of data which we believe delivers long term profitability for commercial and stud breeders

LANDFALL KEYSTONE Q750

Adding genetic depth to future stud herds are sons from renowned sires Keystone & Discovery.

KEYSTONE Q750 - (\$25,000) Blue Ribbon genetics with all top performing Australian Angus sires & out of New Ground N90's dam by Matauri Reality.

DISCOVERY Q534 - (\$16,000) A great pedigree; a Landfall Discovery son & dam is by Landfall Hank. (Not pictured)

Select Sires from our elite stud sire team.

LANDFALL LEONARDO P145

Leonardo P145 has grown into an impressive bull and progeny will be available at future sales. A sire to watch.

He is a good all-rounder & will suit a range of females. He presents with low birthweight & his carcass & calving ease is above average in the breed. This sire sits in Top% for Milk, Rib & Rump with IMF 3.2.

WE WELCOME ALL ENQUIRIES TO PURCHASE BULLS & COMMERCIAL HEIFERS AS WE BREED WITH THE COMMERCIAL & REGISTERED BREEDER IN MIND.

+ GAINS**

EXCELLENCE IN GENETICS

PRE-SALE INSPECTION

The bulls are available for pre-sale inspection from 11am on sale DAY.

Prior inspections are welcome by private appointment. Sale Day will run in line with current Covid-19 guidelines.

AUCTIONSPLUS

The auction is fully interfaced live with AuctionsPlus for those interested buyers who can't make the sale. Please register your interest early to avoid disappointment.

HEALTH OF SALE CATTLE

All bulls offered in this Sale have been vaccinated with Ultravac 7 in 1, Vibriosis, Pesti Guard (BVD), and drenched prior to the sale.

ABSOLUTE ANGUS GUARANTEE

All sale bulls have been DNA Tested and Sire Verified, and independently structurally assessed by Liam Cardile, Beef Excel, to maximize the quality of stock on offer at the sale.

All sale bulls have also been independently inspected by Dick Whale, Breeder Genetics. Dick will be available on Sale Day if you would like any further information on any of the sale bulls. Genomics information on all sale bulls will also be available at the sale.

To the best of our knowledge the bulls offered are in sound working order as at the time of sale. If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the next 12 months, Absolute Angus will:

1. Provide you with a mutually agreeable replacement if available, or
2. We will issue a refund equal to the purchase value minus any salvage value, or
3. Issue you with a credit equal to purchase price minus salvage value to purchase any animal from Absolute Angus within a 2-year time frame.

Please note in some cases a veterinary report may be requested. Normal care and good husbandry practices must be observed as a replacement, or a credit, is not available if a bull is simply injured or dies for any other reason. The guarantee is for the value of the bull without interest, costs, or damages.

INSURANCE

We recommend you insure animals against injury, for transit and potential loss of use in the first joining season. Please ensure bulls are insured at the fall of the hammer as our insurance does not cover injury of bulls in transit. An insurance service will be available on sale day.

SAFETY

All sale bulls are generally quiet to handle under normal conditions however care must be taken during sale day as crowd pressure may change their behaviour. Please use caution and be alert. All visitors enter the cattle display yards at their own risk. Children are not permitted to enter the bull display yards.

DELIVERY OF SALE BULLS

Absolute Angus provide a free delivery service within a 100-kilometre radius from the sale location. Further travel distances can be arranged by negotiation. Please fill out your delivery and insurance instructions.

OUTSIDE AGENT REBATE

A 2% rebate is paid to outside agents, introducing a buyer, and settling within 7 days.

DISCLAIMER

Absolute Angus has taken great care in ensuring the information provided in this catalogue is accurate however we take no responsibility for the accuracy and/or interpretation of the information in this sale catalogue.

Lot 2 ABSOLUTE REMINGTON R065^{SV}

Another strong pedigree & needs no introduction. Sired by Baldrige Command, his dam Absolute Lowan sired by Thomas Upriver & her dam is VTMG251 Emperor's full sister. R065 is a stylish bull with loads of potential & a good data set. Good for heifers or cows.

Lot 3 ABSOLUTE ROCKET R001^{SV}

The first of the Stellar sons to be offered in the sale. Stellar's are doing an outstanding job in the herd. R001 is an outstanding bull & his sire potential is unlimited. He is a great all rounder, a pleasure to look at with style, presence & great temperament. Great for cows & heifers.

Lot 4 ABSOLUTE ROCKET R054^{SV}

R054 has style & stud sire potential with an outstanding pedigree. His dam N297 is by EF Compliment adding softness, carcass & length. In his pedigree this bull has a line of well noted sires - Sydgen Trust, Booroomooka Undertaker to name a few & is then strengthened by the dam blood line the Bara family. A great bull.

Lot 5 ABSOLUTE ROCKET R067^{SV}

Another great Stellar son with a great maternal pedigree with sires include Sydgen Trust & Regent with good data. Good for heifers.

Lot 6 ABSOLUTE ROCKET R019^{SV}

Another top son of Stellar with a outstanding pedigree going back to the well noted cow families of Te Mania Lowan R133 who had 173 progeny registered & Vermont Dreamline bloodlines. R019 is a perfect example of all these great pedigrees. He moves well with great structure & a data to match. Just look at his raw data. A great bull & good for heifers.

Lot 9 ABSOLUTE ROCKET R083^{SV}

A great Stellar son with Edmund & Emperor in his blood lines. Structural and phenotypically well put together. Has plenty of thickness & length.

Lot 15 ABSOLUTE ROCKEFELLER R059^{SV}

A great heifer bull. Very stylish with moderate figures & followed by a impressive pedigree. Good for heifers.

Lot 17 ABSOLUTE ROCKET R028^{SV}

R028 is a stunning bull with Honour and Equator in his pedigree. He moves well with good data. Good for heifers.

Notes: Starting the sale with a outstanding son by Baldridge Command. A nice thick & deep bull with great length. His dam is by Gdar Regulator who is doing a great job in the herd with perfect udders, feet & structure. His maternal side goes back Nicholson Extra, Lawson New Design & LT Bando. A very strong pedigree making R133 a standout bull.

Notes: Another top son of Stellar with a outstanding pedigree going back to the well noted cow families of Te Mania Lowan R133 who had 173 progeny registered & Vermont Dreamline bloodlines. R019 is a perfect example of all these great pedigrees. He moves well with great structure & a data to match. Just look at his raw data. A great bull & good for heifers.

Purchaser..... \$.....

Lot 19 ABSOLUTE NEWGROUND R018^{SV}

The first of the New Ground sons to be offered at Absolute Agus. New Ground is a bull that has tremendous respect in the beef industry. He has great data but it doesn't stop there. He has length, outstanding fertility structure, good feet & is pleasure to look at. New Ground has improved efficiency & profitability within herds. R018 is an impressive bull & very quiet. Good for heifers.

Lot 20 ABSOLUTE NEWGROUND R061^{SV}

R061 is a New Ground son. Another bull with plenty of length & good temperament with a great pedigree. A smooth stylish bull, plenty of eye appeal & great structure. Good for heifers.

Lot 21 ABSOLUTE NEWGROUND R045^{SV}

R045 is the bull to look at. He has good data with style & presence & is a very stylish bull. New Ground has bred extremely well in all areas. His progeny are docile & consistent. R045 will do the same in your herd. An impressive bull with stud sire potential.

Lot 22 ABSOLUTE NEWGROUND R008^{SV}

A great maternal pedigree with Regent & Lowan bloodlines with great data. An impressive bull, he is very quiet, with structure & length.

Lot 23 ABSOLUTE NEWGROUND R046^{SV}

Out of Absolute HRWP804, a Thomas Upriver heifer out of Emperor's sister G251. R046 is a P804 first calf & she did a great job. He has perfect impressive skin & data. Good for heifers.

Lot 24 ABSOLUTE NEWGROUND R023^{SV}

A great bull out of Te Mania H1098. A cow that has bred consistently & is the mother of our top donor cow L75. R023 is smooth & has great data. Good for heifers.

Lot 25 ABSOLUTE ROCKET R043^{SV}

Another outstanding son of Stellar. Thick with great length. A pleasure to look at with depth & structure. Good for heifers.

Lot 28 ABSOLUTE ROCKEFELLER R076^{SV}

R076 is Anthony's pick of the Keystone sons. His dam NDID106 has never failed with her calves & is always producing top of the line breeders. She is the grand mother of R005 New Ground. R076 will be an asset to any herd.

BRINGING YOUR NEW BULL HOME

WHEN PURCHASING A BULL, CARE AND HANDLING AFTER THE SALE CAN BE AS IMPORTANT AS THE PURCHASE ITSELF.
LOOKING AFTER YOUR BULL WELL DURING THE INITIAL STAGES OF HIS WORKING LIFE MAY ENSURE LONGEVITY
AND SUCCESS WITHIN YOUR BREEDING HERD.

PURCHASE

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

DELIVERY

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering. After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

IF YOU USE A PROFESSIONAL CARRIER:

- Make sure the carrier knows which bulls can be mixed together.

- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

ARRIVAL

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning.

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

BRINGING YOUR NEW BULL HOME

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice.

Plan to give follow-up vaccinations 4–6 weeks later. Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

MATING NEW YOUNG BULLS

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

When the young bulls are working, inspect them regularly and closely.

MATING NEW YOUNG BULLS

Older working bulls also need special care and attention before mating starts. They should be tested or checked every year for physical soundness, testicle tone, and serving capacity or ability.

All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition.

DURING MATING

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

NORTHERN AUSTRALIA

Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straight-bred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

ADAPTATION

They key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

PURCHASE IN COOLER MONTHS

Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

CHANGE OF FEED SOURCE

When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

MANAGING CATTLE TICKS

For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember males are more susceptible to ticks than females.

Information is provided by the Department of Primary Industries NSW. For further information visit the DPI web site: www.dpi.nsw.gov.au. or www.angusaustralia.com.au. Further reading - Buying Angus Bulls
